Education

Rochester Institute of Technology

(Aug 2024 - May 2029)

- BS/ME, Mechanical Engineering - Aerospace Concentration, Computer Engineering Minor
 - GPA: 3.94, Dean's List
 - Relevant Courses: Strength of Materials, Thermo, Statics, Eng Design Tools, Eng Mechanics, Comp Sci 1
-

Professional Experience

Mechanical Engineering Department, Rochester, NY

(Aug 2025 -Present)

Engineering Mechanics Lab Teaching Assistant

- Walk students through lab work, emphasizing experimental design and proper lab practices
- Answer questions, grade papers, hold office hours

Mrs. O Service Company, Portland, ME

(May 2025 - Aug 2025)

Cleaning Specialist

- Cleaned Airbnbs and peoples homes, worked in small groups or alone

Hannaford Supermarkets, Yarmouth, ME

(April 2023 - Aug 2024)

Produce Associate, worked over summer breaks

- Assist customers with finding items and giving general information
 - Stock produce, calculate shrinkage, provide basic maintenance
-

Skills

Hardware: General Manufacturing, Precision Machining, 3D Printing, Soldering, Laser and CNC Manufacturing

Software: OnShape, Fusion 360, KiCad, Python, Matlab, C++, Arduino, labView, Javascript, HTML, CSS, Google Suite, Microsoft Office, Excel, Windows, Linux

Projects & Activities

RIT SPEX (Space Exploration)

(Aug 2024 - Present)

- CubeSat; Launching a 1U cubesat into LEO to compare radiation detection methods
- Payload lead; designing radiation detectors using fusion and kiCad to fit integrate with cubesat

Engineering House

(Aug 2024 - Present)

- Organization run by second years, for first years to aid in the transition into college
- Collaborated on creating an articulating arm that uses machine vision to track objects
- Mechanical team: redesigning arm and testing new movement methods to reduce strain on motors

Personal Website

(June 2024 - Aug 2024)

- Website to learn basic web development (html, css, and javascript) and showcase projects over time

Chime Machine

(Aug 2024 - Dec 2024)

- Tasked with constructing a machine to play a selected song with limited resources
- Programmed in c++ and assisted in designing (onshape) and construction of machine

Robotics Club: VRC

(Sept 2017 - June 2024)

- Co-lead 6 person team to State semi-finals
- Cad Designer, Builder, Coder, Competition Drive, and Notebook Scribe
- Awards: 4 Tournament Champions, 3 Skills, 1 Excellence, 1 State Championship Think Award, 2 Design

Wind Turbine Platform

(Feb 2024 - May 2024)

- Competed in competition to design and build a stable floating platform
- Responsible for general planning, calculations, and manufacturing

Electric-Car

(Sept 2023 - June 2024)

- Built an electric car from ground up to compete in Electrathon America
- Used onshape to designed and built backend: motor, ballast, battery support, and wiring
